

SHEHZAD AHMED

Senior AI, Automations & Software Engineer

shehzadahmed.me • shaxad.here@gmail.com • +92 (303) 280-4856 • github.com/shaxadhere

TECHNICAL SKILLS

- **Frontend:** React, Next.js, React Native, TypeScript, JavaScript, Retool, Vue.js, Astro.
- **Backend/Full Stack:** Node.js, NestJS, Spring Boot, .NET Core, PHP, Restful APIs, Apollo, Supabase.
- **Database/Tools:** MySQL, MongoDB, Retool, SQL, NoSQL, Microsoft SignalR, Airtable, Calendly, Lemlist, n8n, Zapier, Make, Active Campaign, Posthog, Hyros, Antigravity, Linear, Trello, Asana
- **Cloud/DevOps:** AWS, Azure, AWS CDK, GitHub Workflows, Docker, Kubernetes, CI/CD pipelines, Devops.
- **AI/ML/Chatbots:** Agentic AI, Chatbots, Claude, Cursur.
- **Digital Marketing:** Meta Ads.

PROFESSIONAL EXPERIENCE

SIMPLIFI

Dubai, UAE

Senior AI, Automations and Software Engineer

Sep 2024 - May 2026

- Drove end-to-end development and maintenance of SimplifiPay's core fintech product (web and mobile), improving performance, strengthening reliability, and supporting rapid customer base growth.
- Integrated business and marketing automation workflows using tools like Zapier, Make, and Apollo to streamline processes and data flow, supporting rapid customer base growth.
- Implemented key product features—including transaction reporting, receipt reminder workflows, debit card branding, and a reusable React-based Web SDK—enabling smoother partner integrations and accelerating feature delivery across the platform.
- Developed internal applications using Retool to manage and visualize client revenue data, providing actionable insights for strategic decision-making.
- Built and launched SimplifiPay's public-facing websites for both B2B and B2C products, strengthening product visibility and directly supporting marketing and sales initiatives.
- Optimized the existing codebase through architectural improvements, refactoring, and performance tuning, which significantly reduced technical debt and enabled faster, more scalable feature delivery.
- Utilized Spring Boot to enhance backend service scalability and integration within the fintech ecosystem.
- Introduced end-to-end testing with Cypress, strengthening QA coverage and reducing production issues through more reliable automated validation.
- Streamlined API usage and implemented best practices for data fetching and caching, delivering faster load times and more efficient API performance across the product.

KODERLABS LLC

Karachi, Pakistan

Senior Automations and Software Engineer

Nov 2022 - Sep 2024

- Engineered and deployed robust, high-performance applications for clients in fintech, e-commerce, and enterprise sectors, consistently delivering tailored, maintainable solutions.
- Built scalable web and mobile experiences using TypeScript, React.js, React Native, Vue.js, and modern JavaScript tooling to deliver reliable, high-quality user interfaces.
- Led end-to-end feature development—from requirements and architectural design through implementation, testing, and deployment—to deliver high-quality, production-ready functionality.

- Leveraged .NET Core for building robust, cross-platform enterprise APIs and microservices.
- Collaborated with design, product, and QA teams to deliver high-quality solutions aligned with client goals and project timelines.
- Improved code quality and engineering standards by introducing stronger development practices, reusable components, and performance-focused optimizations across multiple projects.
- Improved deployment and infrastructure by implementing CI/CD pipelines and leveraging containerization technologies, including Docker and Kubernetes, for consistent and accelerated time-to-market.

YDRIVE – Ride Sharing Application

- Spearheaded the development of all frontend applications (Admin, Super Admin, Customer, Corporate User, Customer Mobile, and Driver Mobile apps) using React and React Native for a cohesive, high-quality user experience.
- Integrated real-time communication using Microsoft SignalR and developed a live map dashboard, drastically enhancing operational visibility for bookings and driver locations.

BHEALTHY – Online Therapy SystemApp

- Developed and maintained the frontend web application, delivering a seamless and responsive user experience for both patients and therapists.

FISHFIN – Social Network for Fishing Community

- Built the frontend admin application, equipping moderators and community managers with efficient tools for user and content management.

DAVINCI VAPORIZER DASHBOARD – Control Panel for Davinci Vapes

- Handled full-stack development of the dashboard, enabling real-time device monitoring, analytics, and remote control capabilities.

RANGE WEBCHAT – Floating Chat SDK

- Developed the frontend web application and SDK, enabling clients to seamlessly integrate a lightweight, responsive chat solution into their websites.

FINE SOLUTIONS

Karachi, Pakistan

Software Engineer

Feb 2022 - Oct 2022

- Built the frontend for UrAudits' core auditing application, delivering a responsive and intuitive user interface.
- Led backend engineers in applying best practices, ensuring clean architecture, maintainable codebases, and scalable API design across the platform.
- Developed Next.js websites and landing pages, and implemented key features for a Human Resource Management System, including employee management and reporting tools.

ARTT BUSINESS SCHOOL

Karachi, Pakistan

Software Engineer

Dec 2020 - Jan 2022

- Developed key features for the Learning Management System, including DRM-protected video lectures, Zoom-integrated live classes, and comprehensive examination modules.
- Built and optimized frontend and backend components to ensure smooth content delivery, responsive interfaces, and reliable user experiences across the platform.
- Contributed to the development of ARTT's accounting system, implementing core financial workflows and reporting features.

MARSOTECH

Karachi, Pakistan

Software Engineer

Mar 2019 - Apr 2020

- Developed a survey web application using ASP.NET MVC and Entity Framework, delivering a responsive and maintainable solution.
- Implemented core features for data collection, storage, and reporting, ensuring strong performance and reliable system behavior.
- Collaborated on frontend and backend integration to deliver a seamless, unified user experience across the application.

EDUCATION

VIRTUAL UNIVERSITY

Bachelors of Computer Science

Karachi, Pakistan

2019-2023

APTECH COMPUTER EDUCATION

Advance Diploma in Software Engineering

Karachi, Pakistan

2017 - 2020

PROFESSIONAL & PROCESS SKILLS

- SDLC, Agile, Jira workflow, Program Management, Front End Development, Mobile App Development, Back end development.
